

## Decision

The screenshot shows a game interface with a yellow background. At the top left is a purple box with a question mark icon and the word 'DECISION'. At the top right, it says 'PLAYER: RAMESH'. In the center, a red-bordered box contains the scenario: 'Ceiling repair costs - Rs. 10000'. Below this, there are three radio button options: 'Bank Loan' (selected), 'Borrow from friend', and 'Borrow from unauthorised dealer'. An 'OK' button is at the bottom of this box. To the right of the red box, an arrow points to it with the label 'SCENARIO'. Another arrow points to the 'OK' button with the label 'CHOOSE OPTION AND CLICK'. At the bottom left, there is a 'MERI DUKAN' logo. To its right, a yellow box displays 'GENERAL INFORMATION' with the following details: 'BANK BALANCE ₹ 2,50,000', 'CASH ₹ 1360', 'DEBT ₹ 0', 'INVENTORY 30%', 'INVENTORY VALUE ₹ 2,50,000', and 'REPUTATION PTS. 10'. A green button with a question mark is at the bottom right.

These spaces pose a scenario, where you need to make a decision. For eg., in the above decision, the scenario is that your store's ceiling needs repair and is going to cost Rs. 10000. The decision is about how you will pay the work?

Each option will make you lose or earn money and/or reputation points. In the example above, taking a bank loan is a safer and better option than borrowing from friends or unauthorized people. Hence this option will earn more reputation points than any of the others.

## Decision - Insurance

A special type of Decision may allow you to purchase Insurance. If you decide to purchase insurance you will be directed to another screen that allows you to select the type of insurance, premium and sum assured.

Once you have purchased Insurance, you will not lose money due to natural calamity, theft etc. Therefore, if you were faced with a Bad Luck scenario where you were due to lose money due to these causes, you would not lose it, as you would be covered by Insurance.
