

Luck

Luck spaces pose lucky or unlucky situations that you face. Lucky situations generally help you earn money or reputation points. Unlucky situations typically cause you to lose money. However, you can avoid losing money if you choose to:

- Answer a question (Take Quiz) – You will be asked a question based on any financial topic. If you can answer it correctly, the fine will be waived.
- Use an Advantage card – If you have one or more advantage cards, you can use one of them to waive the question. Advantage cards can be earned by converting reputation points.

If you click on the 'Pay' button, the fine or payment will be deducted from your bank balance.

Payment

If you are unlucky enough to land on the Payment space, you will have to pay the fine! It will be deducted from your bank balance!

Week Up

This is the space you start the game from. Each time you pass this space, it indicates that one week has elapsed. The following things happen when you pass this space:

- i) The cash that has been collected in the past week needs to be deposited in the bank. You will be shown a screen to do the same
- ii) If four weeks are up since the first time you purchase inventory on credit, you will be reminded to pay off your debt.
- iii) If 12 weeks are up for you, your accounts will be frozen and you will not get a turn until all players finish.

iv) You will also get to see a weekly summary that shows you how the week was
